Junior C.W.L. Is Organized

A Junior Catholic Women's League was organized in Champion on Wednesday afternoon, August 12th, Mrs. A. C. Saunders of Lethbridge, diocesan president of the C.W.L., being the organizer. There was a good attendance and the following officers were elected for the new branch: President, Miss Edna Ohlheimer; 1st vice-president, Miss Leona Bach; 2nd vice president, Miss Melita Fath; 3rd vice president, Miss Geraldine Farmer; Sec.-Treas., Miss Helen Farmer.
The meeting was held in the Catholic church, Rev. Father McAdam being present.

Harvest Making Rapid Progress

Harvesting may be said to have become general this week, the combines getting into action in every direction. Extensive progress has already been made with binders and threshing is expected to start in a few days.

K. R. McLean, of Anderson & McLean, eye specialists, Calgary, begins his fourth year of regular visits to Champion this month. Naturally in so long a connection a large practice has been worked up here which has been mutually satisfactory. His first visit comes on Sept. 4th.

Mr. and Mrs. R. D. Faries arrived in Champion from the coast on their honeymoon trip on Thursday, August 13th, leaving for Trochu on Friday. They expect to return here in about a week when they will take up residence in A. Kramer's house, formerly occupied by Mr. Bachan.

The demand for men is slow as everyone is endeavoring to cut expenses in this respect to the lowest possible notch. The beginning of threshing should provide more employment, although runs will be very short as a rule.

Miss Marjorie Hopkins returned to the Holy Cross Hospital after having spent two week's holidays at her home at Champion. She was accompanied by Miss Jennie Ulfsten, who will begin training in the same institution.

The Saskatchewan government is sponsoring a caragana campaign and distributing seedlings to the farmers throughout the province. It is estimated that by 1933 5,000,000 seedlings will have been distributed.

Champion Wins From Brant

Softball has been growing in popularity here and several games have resulted recently. On Sunday evening there was a record to see a contest in which Brant and Champion teams were the principals. The game was a good one and provided the spectators with lots of room for applause, Champion leading in a 6-8 score. The batteries were: Champion, Robinson and Watts; Brant, Dorothy and Fletcher.

Has Finger End Crushed Off

A. W. Jopling, while unloading gasoline drums on Saturday, had the index finger of his right hand crushed between two drums so badly that amputation at the first joint was found necessary. Most of the end of his finger remained in the glove he was wearing.

Travelling incognito under the name of Prince and Princess Sukhodaya, their Majesties the King and Queen of Siam with a large suite went across Canada by Canadian Pacific from Quebec where they stayed at the Chateau Frontenac, stopping for a couple of weeks at the Banff Springs Hotel in the heart of the Canadian Rockies, where they officially opened the Highland gathering, then going on to Vancouver where they will sail by Canadian Pacific Empress of Canada September 12 for the Orient. They govern a country of 225,000 square miles with a population of about 11,500,000.

A safety bulletin warns motorists that automobile accident frequently occur in summer because a bee gets into the car. Yes, and some occur because a little honey gets too close to the driver.

Spence Withrow, for some years engaged in Hoskins' and Farmer's hardware store, has secured a position at Coldale and left for that point early this week. Spence takes with him the good wishes of many friends.

NOTES AND COMMENT.

The deflation of the currency in this country is receiving considerable attention. It seems to have many things to recommend it. Countries with a silver standard would be able to purchase our goods more freely, and what would be of more importance, debts contracted when wheat was worth \$1.50 per bushel would not have to be paid with wheat grown at a loss at 35 cents per bushel. It is easy to advance arguments against such a change, but the experiment is being tried in Australia with what is said to be a degree of success and we may be able to copy their action if it finally proves a success.

The U.F.A. is asking for a moratorium through a conference recently held at Edmonton. While it appears very unlikely their request will be granted in its original form, it is quite likely that sufficient pressure will be brought to bear on the government to lead to further restriction of enforced collections. Usually interference by the government in such matters has led to unfortunate results in the restriction of credit and loss of confidence. The situation is unusually critical, however and might justify unusual steps.

Both British Columbia and Saskatchewan governments have a campaign in progress urging the people to buy home products as far as possible. It has been noticed here, too, that European nations are forcing their people to buy wheat produced at home. It is this kind of near-sighted manipulation that is keeping world trade from recovering. When it is recognized that an exchange of goods is the basis of all commercial prosperity the nations or provinces trying to live within themselves are shown up as ridiculously narrow minded. Government bungling, however, will continue until in spite of restrictions of every kind good times are forced upon the people.

There should be a good crop of turkeys and spring chicken this fall to judge by the number of grasshoppers available for feed. It is to be hoped, too, that the diligence of the fowls will considerably reduce the numbers of these pests, otherwise next year may see another plague of these insects.

Experts advise farmers to avoid stirring the soil on summerfallow during August and early in September, owing to the prevalence of cutworm

moths, which will lay their eggs in any soil where the crust is broken.

The result of the Beaubarnois investigation not only smudges up leading Liberals thoroughly, but is bound to lead to suspicion of both old parties where election funds are concerned. How many tariff changes were the result of campaign funds? None, perhaps, but the suspicion will always be there.

If the number of grasshoppers in evidence throughout the country at the present time are any indication of the number to be expected next year, poison stations should be numerous in 1932.

Two tramp steamers will load approximately one half million bushels of heavy grain, probably wheat, at Churchill, Manitoba, between the 15th and 26th of September of this year, arrangements having been completed by the Dominion Government for a trial shipment from the Hudson Bay port to Europe.

Russia plans a total area for winter crops 1931-32 of 107 million acres, or practically the same as 1930-31. The plan calls for 37 million acres of winter wheat compared with 31 million this season. The Ukraine is the most important winter crop region and together with northern Caucasus and the central Black Sea sections accounts for about half of the planned acreage. —Searle Grain Report

To commemorate the public services of David Thompson, probably the greatest geographer ever to set foot on the soil of North America, the historic sites and monuments board of Canada has erected a cairn in Jasper National Park, which was unveiled with appropriate ceremony on July 26th.

Western Crop
Of High Quality

Grain which has passed through the inspection department at Winnipeg in the last few days is of exceptionally high quality. A considerable amount has graded No. 1 hard, a great deal has gone No. 1 northern and some has graded No. 2 northern, an account of mixtures of durum and barley, but this year's crop, as far as it has reached the inspection department is of an exceptionally high standard.

This is a statement made a few days ago to the World's Grain Exhibition and Conference by J. D. Fraser, Chief Grain Inspector, Winnipeg, Manitoba. Mr. Fraser stated that the grain thus inspected had come from many different parts of the prairie provinces and indicated that the 1931 crop is of much higher quality than expected. Despite adverse conditions from spring seeding to harvest Western Canada this year has produced a quality of exceptionally high average. Another interesting point about the 1931 crop is that a higher percentage than usual of protein content is indicated by preliminary tests made by Dr. F. J. Birchard, at the research laboratory of the Board of Grain Commissioners for Canada. A few days ago Dr. Birchard told Canadian Press that his tests record 15.3 per cent maximum of protein content as compared with 14.5 last year and the average 12.28 as compared with 11.19 in 1930. "drought conditions," says Dr. Birchard, "have doubtless been the main factors in producing this very strong wheat."

The crop from the prairie provinces, therefore, should be productive of excellent samples of grain for entry in the competitive classes of the World's Grain Exhibition and Conference to be held at Regina July 25 to August 5 of next year.

Pasture Lands Survey to Be Conducted By Professor Of Saskatchewan University

Complete survey of all pasture lands in Canada is to be conducted by Prof. L. E. Kirk, of the University of Saskatchewan, announcement of whose appointment as Dominion Agrostologist was made in the House of Commons by Hon. Robert Weir, Minister of Agriculture.

Reduction in carrying power of ranges has been giving concern to the Government. Mr. Weir said. In order to stimulate the cattle industry a series of experiments are to be conducted as to the best grasses for the purpose. Prof. Kirk is expected to come to Ottawa within the next few months and will supervise the whole program. The time of his assuming the position was stated to depend upon the finding of a successor to his present post in the university.

"In some stations," Mr. Weir said, "it will take four years now to carry as many head of cattle as one acre would have done some years ago. The western farmers, due to the price of wheat and other grains during the past few years, have not been attempting to keep a great deal of livestock, even in districts where they might do so, or to pay attention to forage crops."

"The farmer in the west has been paying attention particularly to the raising of wheat—and I say this without criticizing them, because they turned their attention to that method of farming which they believed would give them the greatest crop—but the result has been, by taking all the fibre and strength out of the land, to create nearly as poor a soil as the ideal condition of the desert."

"One thing we must concentrate on in the west, therefore, is to get the best authorities we can to work on the question of pasturage. There was no doubt that the best man was Professor Kirk of the University of Saskatchewan, at Saskatoon. He is one of the three best men in that part of the American continent, and I think he is easily recognized as the best man in the Dominion of Canada."

The newly appointed Dominion Agrostologist, Dr. L. E. Kirk, was raised on a farm near Hazleton, about 100 miles south-west of Regina. He is professor of field husbandry in the University of Saskatchewan and in his new position will be in charge of development of grasses suitable for use in Canada.

Dr. Kirk is a graduate of the University of Saskatchewan. He obtained the arts degree in 1915; the agricultural degree in 1916, and later his master of science degree. In 1927 he received his doctor's degree in plant breeding, from the University of Minnesota. Since his graduation, Dr. Kirk has been engaged as student-assistant and as professor in production of new varieties of clovers and grasses.

Travelling In Russia

Ticket Must Be Purchased Two Weeks Before Departure

With more than 15,000 breakdowns and wrecks reported during 1930 on Russian railroads, travel in the Soviet Union is now regarded by the inhabitants as an exciting adventure. To secure a ticket, one must stand in line before the ticket window for 12 to 24 hours, and this must be done at least a fortnight before the contemplated journey. Two men sell tickets at different windows, one for even dates and the other for odd dates. Care must be taken by the prospective purchaser that he does not get into the wrong line and thus secure an entire day—Wall Street Journal.

A cubic foot of water contains 7½ gallons and weighs 62½ pounds.

Hurricanes usually originate in the ocean.

"A friend told me you had a place named in your wireless factory."

"Do you know what it is for?"

"Yes, measuring the lengths of waves,"—Moustique, Charleroi.

W. N. U. 1903

Making Work Count

"Record Of Performance" For Poultry, Great Help To Farmers

If the farmer is sufficiently interested in breeding poultry to be doing any tracing on his plant, he can make his work count by being entered in "Record of Performance" for poultry. This is a system of "production recording" on an official basis as the result of which certificates are issued for those birds which conform to requirements as to number and size of eggs laid, and freedom of disqualifications for the breed.

The department at Ottawa supplies the farmer with leg bands for his birds, with report forms, and with the services of an inspector in selecting the entries, and checking any errors which may crop up in his work. All the farmer has to do is to keep his records, sending an official copy weekly to headquarters at Ottawa.

Every month or six weeks the breeder entered in R.O.P. receives a visit from an official inspector whose duty it is to check up on his records and work. As a regular feature of his special duties these inspectors give the breeder all the information and help possible. From one such visit the farmer gets more vital and useful information about breeding work than the price of entry could procure in other ways.

"Sun Spots" and Furs

Control Yield Of Canadian Product Says Oxford Professor

Has the "sun spot" a predominant influence upon the cycles of plenty and want in the supply of Canadian fur-bearing animals? This question was debated at length at the Canadian Biological Conference held in Matamoras, Quebec, following a paper by Charles Elton, a professor of Oxford, England. The paper was based largely upon voluminous records kept for over a century by the Hudson's Bay Company. The peak of abundance in fur-bearing animals was reached every ten years, he said. Some unknown force exerted its influence on animal populations to keep them in step. He was inclined to believe in climatic control. Dr. Huntington, of Yale, said peaks of temperature and barometric pressure generally came out of the Canadian northwest to spread over North America. The solar cycle was the foundation of a great many cycles.

Push Buttons Feed Coal

One man, by merely pressing push buttons, stokes all the coal-burning boilers in a 47-story New York hotel. The boilers burn pulverized coal and a button is pushed exactly the right amount of coal to keep the fire at proper heat is automatically released from the bunkers to the fire box.

Mabel—Well, I certainly wouldn't like to be your shoe.

Kitty—Not surprised; there wouldn't be room for your feet!

C.P.R. ELECTRO-MOTIVE CAR

Rolling out of Winnipeg Monday, August 10, to the accompaniment of contented humming instead of the usual rattling puffing, No. 44, the new Canadian Pacific Railway's electro-motive car started on its destined run on the Algonquin, Man. sub-divisions. It is the first of two gas-electric self-propelling units to be placed on the company's western lines. The second arrives shortly for use on the Webynum and Assiniboia sub-divisions in Southern Saskatchewan.

Including its smoking compartment, the car will accommodate 50 passengers at an average speed of 30 miles per hour, and makes 60 miles at full power. A 17-foot compartment for baggage and express and a section as engine room complete the equipment of the modern traction unit. The car will take two or three trailers. No. 44's first train orders are being handled by C. W. Lester, engineer in the yard, by H. A. Gamble, superintendent of terminals, who will be in the car, and by R. M. Pyne, general superintendent Manitoba district centre, and R. M. Pyne, superintendent of motive power, saw the car off on its first journey. Standing in the door to the engine-room is J. D. Muir, assistant superintendent of motive power.

United States Proposals For A Year's Holiday In War Debts Reconciled With Young Plan

Fighting the Cutworm

Infestation Reduced If Land Left Intact Until End Of September

S. H. Vigor, field crops commissioner, states that the recent rains at or in connection with the infestation of fields by the pale western cutworms.

The cutworm moths will be busy during August and the early part of September laying eggs. The moths have soft bodies and search for dry dusty soil in which to deposit their eggs. The recent rains have packed the soil and formed a crust on top, consequently the moths will pass it over to look for more suitable places.

Land that is intended for cropping next year should not be disturbed by plowing or implements, but the crust left intact through August and until about September 10th.

In areas where cutworms were not very serious this year and it is intended to sow fall rye, this may be proceeded with, as by the time the cutworms hatch out in the spring and commence eating, the rye has obtained a good growth and damage is not so serious as it is with young tender crops such as spring sown grains.

It should be pointed out the rains at this time of year do not affect the crop except by rendering the soil unsuitable for egg laying.

Agriculture In Japan

Amazing Increase In Production Due To Artificial Fertilizers

Japan, a country which was once more densely populated than is China, and whose agricultural territory is limited by four-fifths of the country being mountainous, is exporting rice to China. Until the year 1929, Japan was not growing enough rice for her own people and was forced to import large quantities from China and elsewhere. In 1929, owing largely to scientific methods of cultivation and the use of artificial fertilizers, she produced a surplus and is still looking for markets abroad for her agricultural products.

The direct cause of this phenomenal increase in production is undoubtedly the policy of the Government in encouraging intensive cultivation by the use of large quantities of artificial fertilizers. The annual consumption of sulphate of ammonia alone in Japan is over 500,000 tons and of super-phosphates over 300,000 tons, in addition to which large quantities of guano, nitrate of soda, potash and bean cake are used. The annual expenditure in Japan for fertilizers is over 300,000,000 yen—Weekly Press, Hong Kong.

Praise For New Treaty

Canada's Trade With Australia Will Increase Says Royal Bank

The new treaty between the Dominion of Canada and the Commonwealth of Australia has given a wide variety of Canadian producers a preferred position in the Australian market and constitutes a basis of general optimism concerning the future development of trade between these two countries, states the August letter of the Royal Bank of Canada.

Canadian automobiles, newspaper, timber and canned salmon have been given special consideration, but when Canadian exporters have had time to make their goods better known in the Australian market there should be also a substantial increase in the volume of sales of a wide variety of other products. It has been stated that the value of United States exports will suffer by about \$25,000,000 but there are so many opportunities which have been opened to Canadian exporters by this new treaty that its full ultimate effect cannot be estimated closely.

All-Season Attraction

An all-season attraction at Banff in Banff National Park, Alberta, is swimming in the hot sulphur pools, operated by the department of the interior for visitors to the National Park. There are in all five springs at Banff, the warmest of which is the Upper Spring on Sulphur Mountain. The Cave and Basin pool is the most popular, over 54,000 persons passing through the turnstile last season. The Upper Spring has approximately 35,000 patrons.

The difference between intelligence and education is that you can't be a complacent ass if you have intelligence.

"A butterfly," says a naturalist, "acts practically nothing." He's evicting my petrol lighter."—Moustique, Charleroi.

Proposals of the United States for a year's holiday in war debts and reparations payments have been fitted into the Young plan by the conference of financial experts of the interested nations, after three weeks' discussions in London.

The experts in the cabinet room of the foreign office in London, signed a protocol whereby the suspended payments shall be repaid in ten equal annuities spread over the period from July 2, 1933, to July 1, 1943. This means there will be a year's interim between the expiration and the beginning of repayments.

The suspended payments shall bear interest at three per cent. and shall be "absolute obligations involving no option of postponement," the protocol declares.

The report of the experts says it would have been much better provided for payment if the suspended payments could have been simply a postponement—putting off till 1932 the payments due in 1931, until 1933, the payments due in 1932, and so on. "But," the report says, "a different method was contemplated in the 1932 agreement." The agreement of July 6, 1931, and in view of the importance of reaching an agreement without delay those governments which are not parties to the Franco-American agreement have agreed to adopt the method of repayment contemplated in the agreement.

Other principal provisions of the protocol are:

(1) That unconditional annuities due under the Young plan shall be paid into the Bank for International Settlements and upon condition that they be re-advanced immediately to the German Railway Company.

(2) That payments required for service of the German external loan and for service of the international 5½ per cent. loan of 1930, shall continue to be effected without any change.

(3) That annuities to replace the suspended payments shall be paid in monthly instalments the 15th of each month beginning July 1, 1933. These payments shall amount each year to about \$29,000,000.

(4) Belgium and Germany, it is stated, have come to their own agreement with regard to German marks left in Belgium after the German occupation.

In concluding their work, the experts encountered more difficulty with the smaller governments than with the larger powers. The Greek government, for instance, was able to accept suspension of payments by Germany, but must continue negotiations for the settlement of payments due from Bulgaria.

Another critical point was Jugoslavia's plea that suspension of payments worked a disproportionate hardship on her. This has received consideration, the report says. It is suggested—subject to approval of the central banks—that if the Jugoslavians find itself in difficulty it might depend upon appropriate action from other central banks and the Bank of International Settlements.

The committee said that although somewhat different considerations applied to certain relief, reconstruction and miscellaneous postwar debts due to the European powers, it had been decided to suspend them during the debt holiday also.

A Common Variety

The woman of the house was dissatisfied with the milk supplied to her, and when the milkman arrived she was inclined to be critical.

"Your milk," she said, "has lately been very poor. You expose it to the rain too long."

"Madam," said the milkman, "this is Grade A milk."

"Ah," said the lady. "I thought so—'grey dry milk.' Let me have some of the fine weather variety."

"Some matches, please."

"Ordinary or safety?"

"It doesn't matter—they are to enlighten my petrol lighter."—Moustique, Charleroi.

CHAMPION CHATTER

Vol. 4 Thursday, Aug. 20, 1923 No. 34

Published in the interests of the People of Champion and Farmers of this vicinity.
GEO. L. DEPUÉ, Editor.

Would you believe that there is 50 bushel per acre wheat in Champion district this year? Johnny Harper says he has it.

A court has decided that a cow in the road has the right of way. This indicates that the courts are just learning what the cows have always known.

We have a very special offer for you on a 15 foot grain elevator. This wheat isn't worth breaking your back on.

Barney Hummel just had to tell us this one. "Mother," asked little George, "is it correct to say that you 'water a horse' when he is thirsty?" "Yes, dear," replied Dupe. "Well then," said George, picking up a saucer, "Good Equipment Makes a Good Farmer Better."

"I'm going to milk the cat."

Wm. Penn Motor Oils, "Still the Best."

"There's most everything on the menu to day, sir."

"So I see. Bring me a clean one so I can read it."

Six Big Balls to the bale of Mc-Dr. Twine means less steps in the field to fill the twine can. Every ball guaranteed to contain full listed length and also strength.

"Are the fish biting?" "I don't know, replied the weary angler. "If they are, they're biting each other."

"That cigar is simply swell!"

French Motor Oils at 65 cents and "good oil too."

We have a real good buy in a Dodge light delivery in guaranteed shape.

We're mighty busy these days and pretty dogged tired when night comes, but we're enjoying it immensely thank you.

Blind harvesting is in full swing, while the fore part of next week will see the combines all working.

The man entered Simpson's store and bought a cigar. Five minutes later he dashed back. The man (shouting)—

Local and General

Mrs. Hugo Geschwendt was a recent visitor to Lethbridge.

C. Crowe returned on Wednesday from a two weeks' visit to Calgary.

Carl Johnson of Calgary, Champion old-timer, is here on a visit.

Express rates on the railways are being lowered to meet bus competition.

Mr. and Mrs. Geo. Depue and family spent the week end at Waterton Lakes.

Mr. and Mrs. J. Buchan of Barons were guests of Mr. and Mrs. Walter Harris.

Mrs. Berger is home again after spending several weeks in a visit to relatives.

Glenn Clever is visiting relatives here, particularly his grandfather, M. G. Clever.

Gerald Groves, who has spent some months at Spokane, Wash., returned home recently.

Miss Phyllis Marshman was the guest of Mrs. W. H. Taylor at the latter's summer cottage at Banff.

The young ladies who put on a pageant at the W. I. meeting last week are repeating it at Carmangay on Friday.

Messrs. Whittingham and Shortreed of Vulcan, were visitors in Champion on Saturday evening, en route to Taber.

Ed. Anderson of Calgary, who formerly conducted the Anderson Bros. branch here, paid a visit to his brother, Albert this week.

Absent-minded Dentist (going under the hood of his car with a pair of pliers): "Now, this is going to hurt just a little."

The Champion Pharmacy is making a specialty of school supplies for the opening of school on Sept. 1st. Note advt. in another column.

Deliveries of new wheat continue to show good quality and weight. While a little too hot for some purposes the weather is ideal for combines.

Mr. and Mrs. E. Granlin have taken up residence on I. Granlin's farm.

Harold Lloyd continued the popularity of the "talkies" on Wednesday evening.

Mrs. J. M. Moffatt and children, Mrs. McKibbin and Miss K. Watkins are spending the week at Waterton Lakes.

Mr. and Mrs. J. Q. Reid of Aldrie, were the guests of Mr. and Mrs. Wm. Ulrich for a few days this week.

While the weather is undoubtedly excellent for harvesting, particularly where combines are in use, it is a little too warm and dry to suit the average citizen.

Lars Hjelle has secured quite a number of customers in town for vegetables from his garden at the ditch, the garden crop on the whole having proved a failure.

K. R. McLean, R.O., of McLean & Anderson, Sight specialist, 224-8th Ave West, Calgary, will make his monthly visit to Champion, Friday September 4, at the Drug Store.

R. Gardner has moved his repair shop from the Danny Harper building to the old drug store, and E. Latif is fitting up the Harper building for a grocery.

What was either a remarkable display of aurora borealis, or some other atmospheric disturbance, was evidenced by a bright, almost white streak of sky extending east and west from horizon to horizon on Wednesday night. Nothing just like it could be recalled by the oldest inhabitants.

N. ALVAN HERBALIST

Anyone suffering from Gout, Appendicitis, Tonositis, Paralysis, or any disease, can be cured without operation by consulting the above, at the

Savoy Hotel, Champion, Every Friday Afternoon.

5 REASONS WHY

Alberta POOL Elevators Are Worthy of Support

- 1 The greater the volume handled by Pool elevators the less the cost of handling per bushel.
- 2 Pool elevators are not operated for profit. They are operated to give the farmers the best possible service.
- 3 Pool elevators assure patrons safety on grades and weights. Close adherence to a strict policy of fair treatment of patrons in respect to grades, weights and dockage is insisted upon by the management, acting under instructions from the delegates.
- 4 The history of grain handling and selling since the time when the prairies were first farmed, up to the present, clearly shows the real importance to producers of maintaining an efficient and complete elevator system under their control. This gives producers a power and influence which they otherwise would not have, were they dependent only on facilities owned and operated on a profit-making basis.
- 5 The uneven crop in Alberta, with indications of a reduced aggregate yield from former years only increases the urgent need of seeing that the support of pool elevators, so enthusiastically given in past years, is maintained during the coming crop year to an even greater extent.
